

Bruker Coating Solution

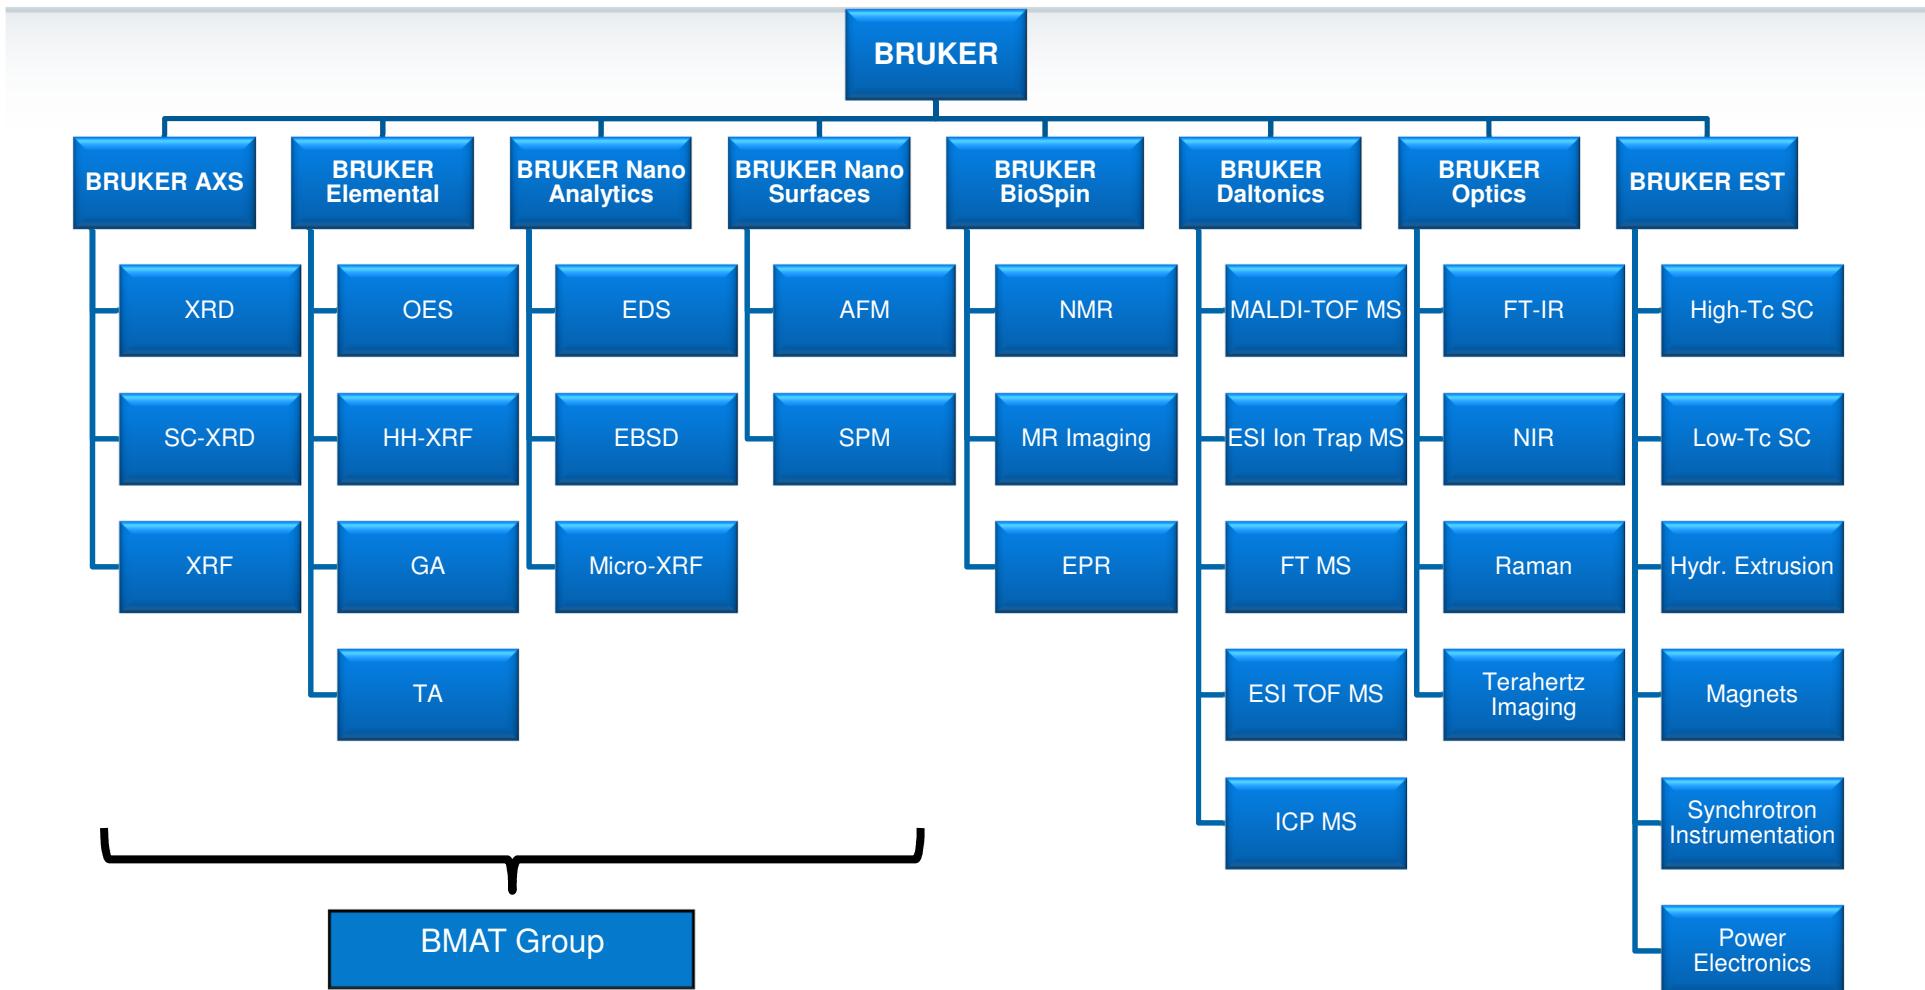

Bruker Corporation

- Bruker Corporation is one of the **worldwide “top ten”** analytical instruments companies with \$ 1.3 Billion 2011 revenue
- Bruker Corporation is listed at the **NASDAQ (BRKR)**
- More than **5400 employees** worldwide
- Bruker was **founded 1960** in Karlsruhe, Germany
- **Headquarters:** Boston (USA), Karlsruhe (D)
- The major Bruker **R&D and production facilities:**
 - Germany: Karlsruhe (4x), Bremen, Leipzig, Berlin, Kalkar
 - France: Wissembourg
 - Switzerland: Zürich
 - United States: Boston, Madison, Santa Barbara, Tucson, Kennewick
 - Japan: Yokohama
 - Belgium: Kontich

Bruker Corporation Groups and Divisions

德國布魯克AXS公司

- 1895年倫琴博士發現X射線
- 1895年西門子開始生產X光管
- 1920年西門子開始X射線分析儀器研發及生產
- 1997年10月 **西門子AXS公司** → **布魯克AXS公司**
- 2001年併購荷蘭 Nonius 公司 (SCD)
- 2002年併購日本 MAC Science 公司 (XRD)
- 2006年併購德國 Quantron公司 (Spark OES)
- 2006年併購德國 Roentec AG公司 (EDS & μ XRF)
- 2006年併購美國 KeyMaster公司 (Hand Held XRF)
- 2008年併購德國 Juwe公司 (Gas Analyzer)
- 2008年併購德國 Surface Imaging System公司 (AFM)
- 2010年併購美國 Varian公司 ICP-MS、Lab GC 、GC/MS/MS產品線
- 2010年併購美國 Veeco公司 AFM and OIM產品線
- 2011年併購美國 CETR公司 (Mechanical & Tribological Tester)
- 2012年併購德國 Hecus MICROcaliX(R) SAXS產品線
- 2012年併購比利時 SKYSCAN 公司(Micro CT)

Bruker AXS Product Lines

- **X-ray Fluorescence Spectrometry (XRF)**
Non destructive determination of the elemental composition of solids and liquids
- **Optical Emission Spectroscopy (OES)**
Elemental analysis of metals
- **Gas Analysis (GA)**
ONH and CS analysis, specific surface area determination
- **X-ray Microanalysis (MA)**
Elemental analysis for electron microscopes
- **Atomic Force Microscopy (AFM)**
Surface characterization with sub-nanometer resolution
- **X-ray Diffraction (XRD)**
Structure, material properties and phase analysis of solid and liquid polycrystalline material
- **Single Crystal X-ray Diffraction (SC-XRD)**
Determination of the 3D structure of crystalline chemical and biological compounds
- **Micro Computed Tomography (μ -CT)**
Three dimensional (3D) imaging of the internal microstructure of objects in a non-destructive, non-invasive way using μ -CT

應用範圍

- 測試元素的含量或鍍層的厚度，**可分析的元素範圍從原子數22(Ti)至92(U)**
- 進行元素成分分析時，儀器可同步分析**28種不同元素的含量**
- 可同時分析**4種度層(基材及3種度層)**含常規元素的修正功能
- 由ISO3497, ASTM B568和DIN 50987所認證的進行度層厚度的測試方法

鎔 Hard Chromium Plating

- Excellent wear resistance
- Good corrosion resistance
- Good hardness
- Good abrasion resistance
- Good heat resistance
- Improvement of life and performance of parts
- Restoring dimensions of undersized parts
- Applications
 - Piston rings
 - Shock absorber rods and struts
 - Hydraulic shafts
 - Various types of tools
 - Plug gages
 - Crankshafts
 - Printing plates

鉻 Decorative Chromium Plating

- Hexavalent & Trivalent
- Good decorative surface finish
- Good corrosion protection
- Applications
 - Automotive parts
 - Golf clubs
 - Door handles
 - Hinges
 - Faucets
 - Plumbing fixture

鎳 Nickel/Electroless Nickel Plating

- Protective-decorative coating
- Good corrosion resistance
- Good wear resistance
- Good uniformity
- Solder-ability
- Low labor costs
- Applications
 - Tools
 - Fasteners
 - Hard drives
 - Electronics components
 - Plumbing fixtures
 - Hardware
 - Heat sinks
 - Fuel injectors
 - Ball studs
 - Shafts
 - Pins
 - Gears
 - Manifolds
 - Pipes
 - Hose couplings
 - Bearings
 - Valves
 - Piston heads
 - Blades

鋅 Zinc Plating

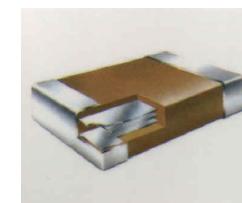

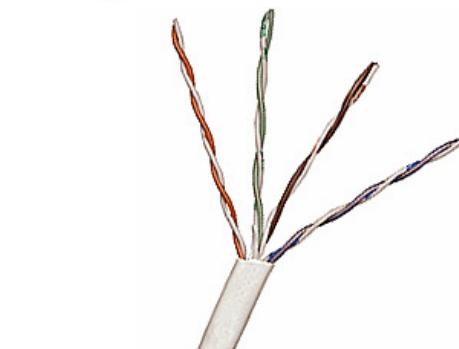

- Good atmospheric corrosion resistance
- Inexpensive
- Supplementary coatings needed
- Poor chemical resistance
- Toxic
- Applications
 - Screws
 - Nuts
 - Bolts
 - Washers
 - Automobile ashtrays
 - Outlet boxes
 - Rivets
 - Conduit tubing
 - Pipe fittings and couplings

錫 Tin Plating

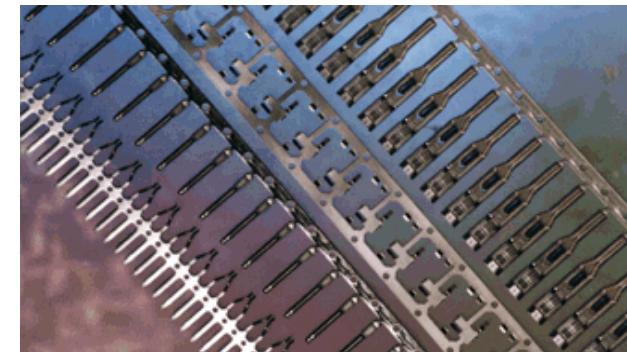

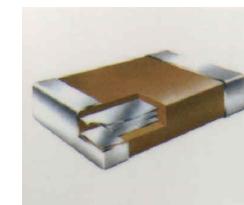

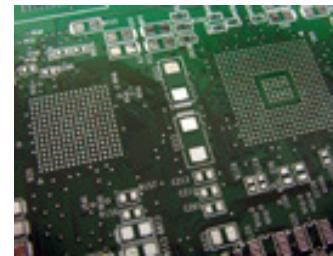

- Good corrosion-tarnish resistance
- Good solder-ability
- Good chemical resistance
- Non-toxic
- Applications
 - Food preservation containers
 - Bearings
 - Lead frames
 - Wires
 - Connectors
 - PCBs
 - Capacitors/resistors

錫鉛 Tin-Lead Plating

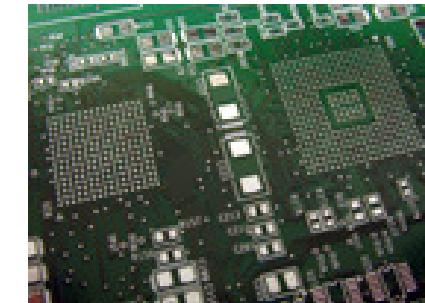

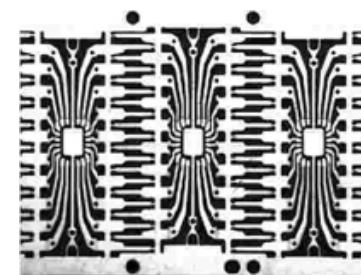

- Excellent corrosion resistance
- Good etch resistance
- Good solder-ability
- Toxic because of lead
- Will be replaced by Sn, SnBi, SnAg, SnCu, SnAgCu coating soon
- Applications
 - Bearings
 - Barrels
 - PCBs
 - Lead frames
 - Capacitors/resistors

銀 Silver Plating

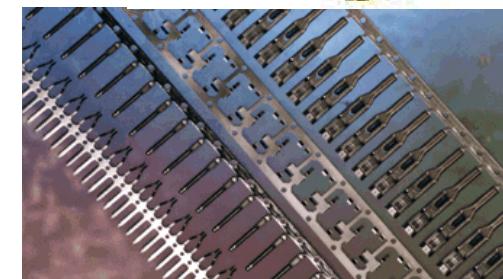

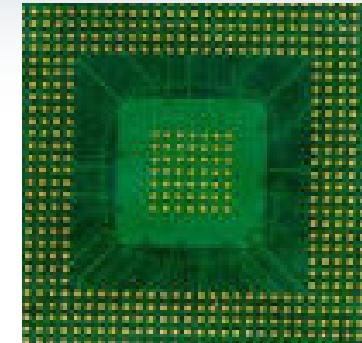

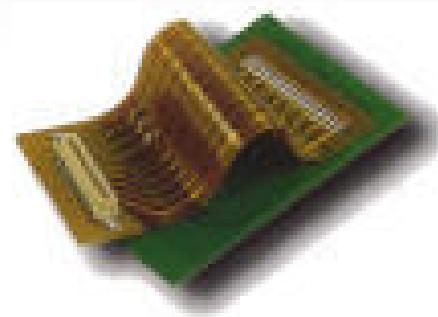

- Good corrosion resistance
- Good chemical resistance
- Good electrical conductivity
- Good decorative appearance
- Non-toxic
- Applications
 - Tableware
 - Flatware
 - Chemical storage container
 - PCBs
 - Connectors
 - Wires
 - Capacitors/resistors
 - Jewelry

金 Gold Plating

- Good corrosion resistance
- Good wear resistance
- Good solder-ability
- Good weld-ability
- Low porosity
- Low electrical contact resistance
- Good decorative appearance
- Applications
 - Jewelry
 - PCBs
 - Connectors
 - Wires
 - Lead frames

銅 Copper Plating

- Good stop-offs for heat transfer
- Fair corrosion-resistance
- Underplates in multi-layer plating
- Applications
 - PCBs
 - Plumbing fixtures
 - Pipes, valves and fittings
 - Connectors
 - Wires
 - Lead frames

钛 Titanium Coatings

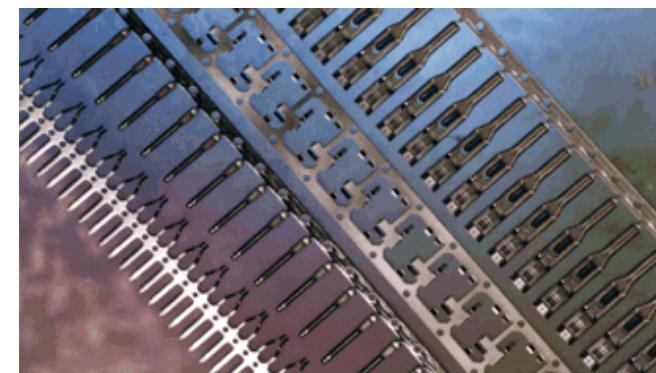

- Good corrosion resistance
- Good wear resistance
- Decreased friction coefficient
- Improved cutting characteristics
- Increased tool life
- Applications
 - Cutting tools
 - Aerospace components
 - Medical devices
 - Blades, slitters and knives
 - Shafts and seals
 - Sliding and rotating components
 - Eyeglass frames
 - Punches and dies
 - Automotive parts

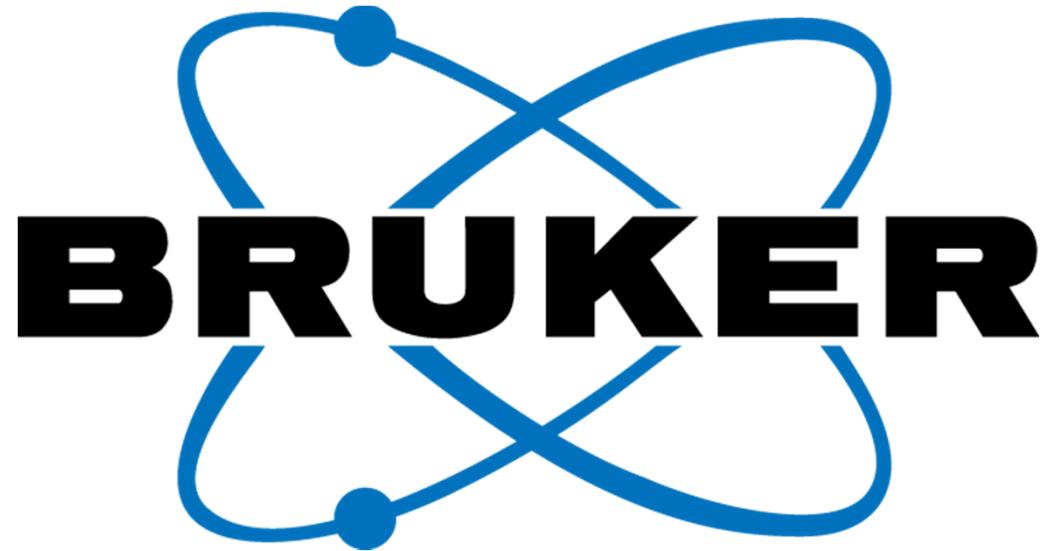

白金 Platinum Group Plating

- Ir, Pt, Rh, Pd, Ru
- Good corrosion resistance at high temperature
- Low diffusion coefficient
- Improved life
- Decorative surface finish
- Low electrical resistivity
- High hardness

Innovation with Integrity
